STEAM MACHINERY FOR U. S. STEAM FRIGATES.

DROPOSITIONS will be received at this depart ment until the first day of August next, for the complete construction of the steam machinery and appendages, and placing it on board of five auxili ary screw steam frigates, to be at least 255 feet in

all patent fees for any arrangement that may be proposed, and must state the period within which ing up, of composition. The fresh water condensers machinery for hoisting, ventilating, pamps, &c., with appurtenances of all kinds, must be those most approved for merine engines. The tools and duplicate pieces necessary for an efficient cruising ship-of-war, a list of which must accompany the proposal, and also the coal bunkers, must be inclu-

All the wood and carpenter work necessary adapt the vessel for the reception of the engines, the City Hotel, in the city of Richmond, says he boilers, propellers, &c., will be at the expense of the Navy Department, and it will furnish the usual facilities and labor for hoisting the machinery on board.

For the accommodation of the entire steam machinery with fuel for ten days' consumption, at the average speed, at a load draft of water of 23 fest, including the keel, a length not to exceed 60 feet can be allowed in the body of the ship, including the entire space under the birth deck. The greatest breadth of this space under the beam will be 47 ft. and the height from the timbers to the bottom o the beam 17 feet; the area of the section being 662 square feet.

The weight of all the steam machinery, water in the boilers and coal within the space given, and including the propeller and shaft, with appendages of all kinds and spare pieces, has been estimated at 735 tons of 2,240 pounds, of which 250 tons is for coal. The distance between the main stern-post, and the rudder post may be six feet, if that length is ne cessary for the propeller in a fore and aft direction, and the depth from the load water line to the top of the keel under the propeller will be 21 feet. The leagth from the mainmast to the stern-post will be about 112 feet. The area of the greatest immersed transversed section to the deep load line will be 865

As auxiliary steam frigates the spars and rigging will be those of a frigate of the first class, of 1,800 tons measurement. The particular arrangement of the mac inery will be left with those whose propositions may be accepted as combining the greatest number of advantages; the desire of the department being to obtain the greatest speed and power with the most economical

consumption of fuel, which the space available for that purpose will admit. The terms of payment will be as follows: when one-third of the work pravided for by the contract shall have been completed to the satisfaction of the department, there shall be a payment of one fifth of of the work shall, in like manuer, be completed, the ship shall have made a trial trip, satisfactory to the department, of not less than one week at sea, there shall be a further payment of one fifth; and when the ship that have been in possessirn of the department, and performed satisfactorily for six months, the remaining sum shall be paid; the repairs necessary during this period, from defective

PHILADELPHIA, March, 1, 1863. Dr. C. M. Jackson: Dear Sir-For the past two years I have been severely afflicted with Liver Complaint, Dyspepsia, Bilious Diarrhesa, and Files, sui fering in a great degree constantly, the pains and in-conveniences attendant upon such diseases, without energy, being scarcely able to attend to any busi-ness. I lost a great deal of my flesh, and used many kinds of medicine, with no apparent change, until I commenced with your "Hoofiand's German Bitters," they have entirely cured me. I have gained in weight over forty pounds since I commenced their use, and I am now entirely free from pain and ache of any kind, and feel like a new man. I unhesitatingly recommend your Bitters to all invelide.
